Sift Collection / EMI8092017

by Jewellery EM

The Sift Collection is about sifting through our inner selves. This activity should be performed all the time and will keep us conscious about the world that surrounds us.

Each ring from this collection represents a temple dedicated to the activity of sifting. Every human being has it's own yin and yang, the duality of black and white, and our task is to always be prone to analyze, think and feel about balancing our nature.

Their ancient appearance is a reminder that our roots are deeply hidden in the past and the reason we are still what we are is our understanding of the past.

The Sift collection consists of 21 sculptural and wearable rings made of bronze, of which some of them have negative intaglio sculptures in quartz, agate and hematite stone and miniature oil paintings.

negative intaglio technique

Ring No.19

Hand carved bronze /
Sculpture in enamel - negative intaglio technique

Ring No.21

Hand carved bronze /
Sculpture in enamel - negative intaglio technique

About us

Jewellery EM

by

Ena Mulavdic and Ebrahim Mohammadian

Ena Mulavdic and Ebrahim Mohammadian are jewellery designers and artists who work together on their exceptional jewellery designs. They have founded their own jewellery brand “Jewellery EM” in 2016.

The story of the Jewellery EM has its beginning in Istanbul, where Ena and Ebrahim have met in 2013. While both came from different cultures and met in equally multicultural Istanbul, they had much to share about their lifestyles and world outlook. At that time Ena was studying her master's degree in Industrial Design at Mimar Sinan University, while Ebrahim was working as a thriving young freelance artist and jewellery designer. The idea for creating a common brand came after three beautiful years of caring friendship, mutual support and genuine understanding of each other's philosophy of life. Moreover, the mixture of different cultures and origins that they have in common was appealing and winsome, bringing a special charm into their friendship and peculiarly into Jewellery EM brand.

Their work explores life in every single way – from birth to death, with all the love, hate, happiness, sadness, excitement, good, bad, care, prosper, decline, lightness, darkness and numerous other conditions and situations that we all are exposed to during our lifetime. Each piece of Jewellery EM is unique and inimitably designed, making them a significant art piece. Their unprecedented esthetics derives from a prosperous mélange of artistic and design skills, while freely using a wide variety of materials. Their designs are fusion of different and rich backgrounds, both collaborating in making a profound and wonderful jewellery designs. All of the Jewellery EM is made carefully, with loads of love, in their studio.

Ena and Ebrahim have previously exposed their artworks and designs all around the world, participated in numerous design festivals and their work has taken part in several magazines and books.
